To Whom It May Concern,

From start to finish, Worship Interiors provided an excellent experience for our pew refurbishment project. Eric came to multiple remodel meetings and convinced us that his company would be the best fit for our project. We made our schedule and Eric came with his crew to disassemble our 22 pews on a Sunday after our last service. We had scheduled the acoustic ceiling abatement work to begin the next day so Worship Interiors worked late into the night to meet our needs. Every pew piece was individually serialized so the pews would be reconstructed to their exact same positions.

Worship Interiors was again very easy to work with when it came time to re-assemble the sanctuary. They aligned all the pews according to their original positions but we had added a sound booth and the pew layout now looked a bit awkward. The workers were very helpful as we made minor adjustments to improve the feel.

We had selected a new fabric and a lighter stain for our oak pews. They looked great and the congregation expressed many positive comments about the results. I very enthusiastically recommend using Worship Interiors for your pew refurbishment project.
